

## Paseo de Mission Hills

### Construction Update September 2008

Here is an update of continued construction activities scheduled for Paseo de Mission Hills

- Placement of reinforcing steel
- Placement of concrete columns and shear walls
- Placement of Level 2 and Level 3 concrete decks
- SDG&E energizing and Power Pole removal (Falcon St.)

Please note that during these operations, the traffic patterns will be adjusted as equipment and materials arrive to the job site.

Now that we have surpassed the podium level with our concrete structure, we are now proceeding upward to Level 2 and beyond. Still more of the same operations will take place for the month of September and the lane closures of Falcon St. and Fort Stockton St. will continue to occur on an as needed basis. The tentative concrete deck pours are **Friday September 5<sup>th</sup> for deck #2 and Thursday September 25<sup>th</sup> for deck #3**. We will notify the public if there are any changes to this schedule.

Please continue to be aware of our construction traffic, daily activities and deliveries, and please utilize the pedestrian walkways provided for public safety.

Thank you for your continued support.
